Last Friday, PARAVAN GmbH honored its long-time employees for their loyalty and tireless commitment. Uwe Failenschmid and Achim Betz were honored for 25 years of service. Alexander Langer can look back on an impressive 20 years with the company. In addition, Frank Fischborn, Markus Locher, Gregory Long and Tobias Swoboda each celebrated their tenth anniversary with PARAVAN.

"Without our employees, we would not be what we are today," stressed Martina Arnold in her speech. She thanked the employees for their commitment and the trust they have placed in the company over the years. The award underscores the importance of consistency and loyalty to the company's success. "In an ever-changing world, loyal and reliable employees are an indispensable pillar of stability and innovation. Their many years of service underscore not only their expertise, but also the strong bond they have with our company and our values," continues Martina Arnold on behalf of the management.

PARAVAN stands for innovative mobility solutions - and behind every innovation are people who work with heart and mind to make the company's vision a reality. "We are proud to offer a working environment in which talent can flourish and long-term partnerships can develop," emphasizes the management. PARAVAN congratulates its employees and looks forward to many more years of exciting challenges and successes.

About Paravan GmbH:

PARAVAN GmbH is the global market leader in customized vehicle solutions for the disabled people. About 160 employees at the Pfronstetten Aichelau and Heidelberg sites develop and produce customized vehicle conversions, electric wheelchairs and even specialized driver training. PARAVAN pursues a holistic approach with its "one-stop shop" concept. The technological highlight is Space Drive, an intelligent digital control system based on the drive-by-wire principle. Thanks to the active redundancy of the servo motors, it is completely fail-safe and the first to be approved for road use. This

PRESS RELEASE

innovation enables severely disabled people, some of whom have no arms or legs, to drive independently and safely. It is not possible for these drivers to simply take control of the steering wheel. Over the past 20 years, Space Drive has been proven on more than one billion kilometers of roads worldwide and is used by numerous industrial customers for test vehicles in the field of autonomous driving. The system is available as a retrofit kit with an open interface for all known vehicle types. www.paravan.com
